PRACTICE THESE WALKER/JOGGER TIPS:

- Be aware of your surroundings at all times – listening to loud music in your headphones limits your ability to hear an offender.
- Jog or walk in a well-lit, well-traveled familiar area - Wearing bright colored or reflective clothes improves your visibility.
- Run or walk in groups – There's always safety in numbers.
- Theft is a crime of opportunity, when going to the gym, don't leave valuables visible in your car – placing them in your trunk makes your vehicle less desirable for burglars.
- Once inside the gym, store your phone and keys in a gym locker with a lock, or wear a fanny pack and keep them with you at all times.

Vision 2050 and Orange Code

Orange County is one of the fastest growing regions in the United States. Since the 1950s, Orange County has managed development based on separation of uses. This practice has kept things like homes, shops, office and restaurants separate from each other and you usually drive where you want to go.

Vision 2050 and Orange Code will shape a smarter, more sustainable future for Orange County. Vision 2050 lays out the blueprint for Orange County's growth over the next three decades, while Orange Code establishes the development guidelines needed to bring this vision to life.

Safety Tips for Trading in Your Old Phone

As technology advances, having to upgrade an old cell phone is one type of consumer transaction that is inevitable for cell phone users. When the time comes to choose a new phone, consumers often have the option to trade in their old phone so they can save money toward their purchase. Here are a few tips to help keep your personal data safe when trading in your phone.

1. Back up your phone onto your computer. If you want to be extra safe, save a second backup on an external hard drive or USB memory stick.
2. Remove any SIM cards or memory cards from the device.
3. Wipe all data off the phone you are trading in. Just deleting files often isn't enough. Using the option to restore the phone to the original factory setting is the best way to completely remove all data from the phone.
4. If the phone you are trading in was used for connecting to any online services, log into those services with a different device and remove your old phone from the list of trusted devices.

If you are a homeowner and do not have a sewer connection, you may be eligible for a **rebate of up to \$10,000** on an advanced treatment septic system.
